

## BACK PAINTED GLASS

The Glasskote process now gives architects, designers, builders and homeowners a sensational new material to work with. Ideal for kitchens, bathrooms and splashbacks, the Glasskote process can be applied to any thickness of glass.

### Benefits:

- Choice of any RAL colour
- Cost effective
- Almost every type of glass can be coated
- Easily cleaned
- Durable and heat resistant
- Cut or drilled to accommodate fixings
- Colourfast and non-staining
- Minimal joins - no grouting required
- Reduced wall preparation
- Consistent colour
- Can be toughened
- Available in large sizes
- Adhesive or screw fixed

### Specifications:
